Werkstudent*in Software Entwicklung

Want to make the agriculture of tomorrow smarter? BHTronik develops and manufactures innovative electronic solutions for agricultural technology. True to our #BHTronisch spirit, we partner with our clients in an easygoing, collaborative way to bring the best solutions to fields around the globe. In doing so, we bridge the future-proof field of electrical engineering with agriculture—an exciting and pioneering space we call "future fields." Help us shape these fields of tomorrow and become part of our BHTeam!

Über BHTronik:

BHTronik ist ein innovatives und aufstrebendes Unternehmen. Unseren Erfolg verdanken wir in erster Linie dem Know-how und dem Engagement unserer Mitarbeiter. Mit viel Gestaltungsspielraum hat jeder Mitarbeiter die Möglichkeit, seine Ideen und seine Expertise einzubringen und so aktiv am Erfolg des Unternehmens mitzuwirken. Dabei setzen wir alles daran, jeden Einzelnen zu fördern und zu unterstützen. Flache Hierarchien, Zusammenhalt und ein freundschaftliches Miteinander machen die Arbeitsatmosphäre bei uns besonders angenehm. Regelmäßige Firmenevents, soziales Engagement und eine ausgewogene Work-Life-Balance runden das Ganze ab.

Mögliche Aufgabenfelder:

Since this is an unsolicited application, you aren't tied to a rigid job profile. We review your application on an individual basis for exciting opportunities across our various departments. Possible areas include:

- Development: Work directly on the "future fields" of agricultural technology in hardware, software, or mechanical engineering.
- Project Planning & Manufacturing: Help bring smart electronic solutions into practical application.
- End-to-End Processes: Become part of the entire value chain—from the very first product idea and prototyping all the way to series production.

Das bringen Sie mit:

- Enthusiasm: You are passionate about cutting-edge technology and share our dedication to smart tech.
- Know-How: You bring specialized expertise, a relevant degree/vocational training, or a strong interest in electrical engineering, mechatronics, IT, or agriculture.
- Drive to Shape Things: You want to actively bring your own ideas and expertise to the table and move them forward.
- Team Spirit: You are a true team player who enjoys straightforward communication and values collaborative teamwork as equals.

Wir bieten Ihnen:

- Creative Freedom: Here, you are not just a small cog in a machine—you actively contribute to the company's success.
- Agility & Innovation: Short lines of communication and flat hierarchies allow us to respond quickly and flexibly to new challenges.
- Community: Expect a company culture built on mutual respect, where teamwork is a top priority and victories are celebrated together.
- Security & Growth: A permanent, secure position (part-time or full-time) within a steadily growing specialized company.
